
RAYCKA MESSA DE CASTRO

Full Stack Developer

Rolim de Moura - RO, Brazil | +55 (69) 99924-1781 | rayckadevweb@gmail.com

LinkedIn: <https://www.linkedin.com/in/raycka-messa-de-castro-408264327>

GitHub: <https://github.com/Rayck4dev> | **Portfolio:** <https://portfoliorayckacastro.netlify.app/>

PROFESSIONAL SUMMARY

Developer with a solid foundation in the JavaScript ecosystem (React.js, Node.js) and TypeScript, specializing in creating high-fidelity visual interfaces (UI/UX) and responsive systems. Hands-on experience in Agile development (Scrum), version control, RESTful API integration, and data automation, with a focus on efficiency and scalability. Passionate about performance optimization and strongly interested in "Security by Design" practices. Available for on-site or global remote work.

TECHNICAL SKILLS

- **Front-End:** React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Expo, Tailwind CSS, NativeWind, HTML5, CSS3, SCSS (Conceitos), Figma, UI/UX Design, Responsividade (Mobile-First).
- **Back-End & APIs:** Node.js, Express, PHP (CodeIgniter 4), Java, Python, Integração de APIs REST/RESTful.
- **Databases:** PostgreSQL, MySQL, Supabase (BaaS).
- **Data & Infrastructure:** Docker, Apache Hop (Engenharia de Dados / ETL).
- **Tools & Deploy:** Git, GitHub, Vercel, Netlify, WordPress.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | 06/2025 – Present

Role: Front-End / Full-Stack Developer

- Developed and componentized modern web interfaces and SPAs using React.js and TypeScript, prioritizing usability, clean code, and accessibility.
- Implemented advanced, dynamic styling utilizing Tailwind CSS, ensuring fluid layouts and total responsiveness across diverse devices.
- Created and maintained optimized Back-End routes using Node.js and Express, improving server response times and database connectivity.
- Actively participated in requirement gathering, high-fidelity UI prototyping via Figma, and sprint alignment under Scrum methodologies.

KEY PROJECTS

Delícias no Pote 2.0 (Digital Menu) | *React.js, Tailwind CSS, Supabase*

- **SPA with Secure Administrative Dashboard:** Development of a Single Page Application (SPA) integrated with a private control panel for real-time inventory tracking and comprehensive product management.
- **Data Persistence & CRUD with Supabase:** Implementation of full CRUD capabilities and integration with Supabase Storage for secure media uploads and automated image hosting persistence.
- **Conversion-Focused UI/UX & Dynamic Feedback:** Crafted a fluid, user-centric interface using programmatic loading states and instant alert systems (toasts), optimizing the end-user experience to maximize sales conversions.

ETL Pipeline & Dashboard - Gas Aid Analysis | *Apache Hop, Docker, Databases*

- **Data Engineering with Apache Hop & Docker:** Built robust Extraction, Transformation, and Loading (ETL) pipelines for Brazilian Federal Government public data, containerizing environments via Docker to ensure cross-platform portability.
- **Complex Data Modeling:** Handled data cleansing, sanitization, and relational database modeling to analyze correlations between government social programs and regional vulnerability indexes.
- **Predictive Analysis & Strategic Dashboards:** Developed key analytical metrics displayed on interactive panels, turning raw social data into visual intelligence for decision-making.

InkMaster Studio (Website & Portfolio) | *React.js, Premium UI/UX, Mobile-First*

- **Immersive Thematic Interface:** Crafted a high-fidelity visual experience for tattoo studios, deploying a modern dark-mode layout, fluid animations, and user flows designed to drive customer booking conversions.
- **Advanced Componentization & State Management:** Created simulated booking pipelines and dynamic artist portfolios utilizing highly reusable React components and robust state handling.
- **Advanced Responsiveness & Extreme Performance:** Applied Mobile-First design paradigms alongside rigorous asset optimization to handle heavy image rendering gracefully across any screen size.

EDUCATION

Bachelor's Degree in Software Analysis and Development

Uninassau Cacoal - RO, Brazil | Expected Graduation: 12/2026

CERTIFICATIONS & TRAINING

- React: From Zero to Mastery – Udemy (2026)
- Front-End Development: HTML, CSS, JS, React, and TypeScript – Udemy (2026)
- Data Science & Analytics with Python II – Alura (2026)
- Cloudflare Essentials Workshop – FormanDevs (2025)
- Prompt Engineering Techniques – DIO (2026)
- English – Professional Working Proficiency for Reading Technical Documentation
